Project Spotlight: Home Fire Damage

Cause

On June 11, 2011, a kitchen fire damaged the home of an elderly homeowner in Dover, Delaware.

Damage Description

The blaze completely destroyed the home's kitchen. All walls, flooring, cabinetry, appliances and fixtures were damaged beyond repair. Additionally, the hallway bathroom sustained smoke and water damage, and required a complete restoration.

Action

ACCORD Restoration was called to the residence and secured the home by boarding it up until restoration efforts could begin. ACCORD worked with the 87 year-old homeowner and his insurance professionals to completely update both the kitchen and the bathroom. New flooring, cabinets, countertops and appliances were chosen, and the ACCORD Restoration team worked diligently to restore the home.

Impact on Claim

The home was restored beyond its original state, incorporating up-to-date appliances, fixtures and a fresh new look. Although the homeowner was naturally shaken up by the fire, he is delighted at the result of the kitchen and bathroom restoration.
